In re application: SELF-BALLASTED SCREW-IN  
FLUORESCENT LAMP

Applicant: Ole K. Nilssen  
Serial No: 07/020,478  
Filed: 03/02/87  
Group Art Unit: 266  
Examiner: DAVID K. MOORE

GROUP 200

AMENDMENT C

Commissioner of Patents and Trademarks  
Washington, D.C. 20231

Applicant provides the following response to Office Action  
dated 02/03/89.

IN THE CLAIMS

Claims 1-4 and 6-15 are further amended. Moreover, claims  
16-22 have been added. All the claims as currently amended are  
presented in the attached seven-page document entitled Amended  
Claims in Serial No. 07/020,478.

To cover the fee for the additional claims, a check (#3135)  
for \$57.00 is enclosed.

ARGUMENTS IN SUPPORT OF CLAIMS

The claims as now amended clearly distinguishes over Miller  
as combined with Anderson.

In particular, Examiner argued that:

"It would have been obvious ... to employ the Anderson  
arrangement to fill in the unspecified high frequency oscillator  
circuit required by Miller ... because the choice of converter  
types is left up to the skilled designer by Miller".

Thus, Examiner holds that Anderson's inverter would be an  
obvious choice for Miller's unspecified oscillator 18.
